self, and at times he employs as high as fifty hands. At the international labor congress recently in session in Brussels there was a notable display of moderation by a large section of the delegates on the shorter-hours question and May-day observance. A resolution in favor o the eight-hour day without any reducpiece-work was defeated, and the congress merely made a recommendation that an appeal be addressed to the governments of the world for an interna-

tional conference upon these subjects THE New York Medical Record urger the disuse altogether of unsterilized cow's milk as food for young children. insisting that more harm than good comes from such food. The Record is of the opinion that cow's milk is a fruitful source of much of the tuberer losis that now curses humanity, that in the very young the tubercles do not attack the lungs as at a mature age, but the mesenteric and other lymph glands. The point is made that in Japan, where there are no cows, tuberculosis is unknown.

In spite of the utmost efforts and the influence of a particularly propitious climate the cotton growers of India are not able to produce more than seventy five pounds to the acre, while the average American crops is 175 pounds. It i said that the cost of cultivating an acre of cotton on India is equal to the cost of cultivating the same area in this country, and the smaller product is at the same time inferior. At one time in history India constituted formidable . rival to the United States in her export of cotton, but most of her product is now consumed at home.

A NEW French law now in effect provides that foreigners who have not obtained leave to be domiciled in France. or who come into that country for the purpose of exercising their professions or doing any kind of business therein, will have to register within eight days after the arrival at the place where a flag that means something. they propose to reside. that such foreigners will receive, upon payment of a fee, a certificate stating that they have complied with the law, without which they can not obtain employment and that if they change their place of residence their certificates is to be vised by the mayor of the locality.

BANDITS CAUGHT.

The Mound Train Robbers Under Arrest ond One Has Confessed.
Oswroo, Kas., Sept. 18.—The men who held up and robbed the Frisco east-bound train at Mound Valley last Sunday morning have been captured. Their names are George and Charles McCune, Charles Bahut and W. W. Curry. The capture was made at Arkansas City, Kan., where the outlaws had joined the multitude of boomers who swarmed about that city waiting for the opening of the Cherokee strip. One of the bandits has made a confession and has admitted that he fired the

shot which killed Messenger Chapman. The men belong to the class known as fakirs at racing grounds and county fairs. They are not known to the flicers of Kansas or the marshale of Indian Territory, and it is not thought cates were issued, but as the clerks be- that any of them have records as descame more familiar with their duties peradoes or train robbers prior to the they worked more rapidly. The record affair of Mound Valley. The robbers or the day was 1,689. were brought here Monday. The cap-tit this rate it is impossible for all to ture was made by officers of this coun-

locating booths on the strip away from the water and shelter.

John B. Cameron, a Kansas City real talk of lynching should they restate man, who had been waiting main here. After robbing the train the robbers got into an old hack and drove to Coffeyville, Kan. There Geo. McCune, being drunk, met an old chum, Sam Jones, and told him what hey had done. The party then started or the Strip, and Jones informed Marshal Jackson and a posse overtook and shal Jackson and a posse overtook and captured them. A valise full of watches and jewelry was taken from them. The pistol found near the place of robbery is said to belong to Curry. The es and jewelry was taken from them. The pistol found near the place of robbery is said to belong to Curry. The officers will not state which of the men onfessed to killing Messenger Chap-

WASHINGTON, Sept. T.—SENATE.—The resolution offered by Mr. Morgan, of Alabama, for the appointment of a joint select committee on finance came before the scrate atmost at the opening of its proceedings. Mr. Morgan made a bitterly violent, assault upon the articoniingrace to this congress," and then while the scople were starving had loaded them up wi people were starving had loaded them up with depreciated accurities, and now, in order that they might realize their profits, had suddenly released their looked up money; had caused the financial stringency which they had created suddenly to disappear, end had caused stocks to boom. After Morgan's address of two hours' duration the repeal bill was discussed. House—The house renumed business Wednes-day on the rules. Mr. Catchings, a democratic member of the committee on rules, armounced

ember of the committee on rules, annotat the committee had determined to com the proposition to make 100 a quarum of committee of the whole. This was the rule in a Fifty-first congress, but was opposed on the necratic side of the present hou a. It was sted out Wednesday, but not until there has seen a good deal of useless party debate.

Washington, Sept. 8.—SENATE—The sestion of the senate Thursday was exceptionally

and developed no new features in the sit in a Mr Walthall, of Mississippi, read a long speech in favor of bimetallism, in which he advocated that the repeal bill be accompanied by some formal and binding agreement that slation designed to maintain silver as r opon an equality with rold should immediately ollow. Perhaps the most interesting event of the day was the conclusion of Senator Stewart's speech Mr Siewart occupied the time if not the attention of the senate for a total period of over ten hours scattered through three days. Hotsm-The house completed the considera-tion of the rules and they were adopted with ly two important changes. course it does, and people ome to the conclusion, weak-minded Christians come to the conclusion, this everygreat trial going on for centuries and for ages between skepticism, the plain tiff, versus Christianity, the defendant. The scientists have been impaneled and sworn on the jury. They have been gone for centuries, some of them, and they come back, and we say: "Gentle-Cunard steamer, he makes more ex- men of the jury, have you agreed upon citement than all the 500 sand passen. a verdict?" They say: "No, we have gers who continue in the berths or on the decks; but, does that stop the ship?

Does that wreck all the 500 passengers?

Then we say: "Go back for a few more centuries, and then come in and see if you can agree, see if you It makes great excitement when a man | can render some verdict." Now, there verdict as these men have rendered,

> they themselves not having been able to agree. But my subject shall no longer be defensive; it must be aggressive. I must show you that instead of Chris tianity falling back, it is on the march and that the coming religion of the world is to be the religion of the Lord Jesus Christ ten thousand times intensifled. It is to take possession of everything-of all laws, all manners, all customs, all cities, all nations. It is going to be so mighty as compared with what it has been, so much more mighty, that it will seem almost like a new re-

never seen. Could such a thing as I adopt this theory because Caristianwould swoop on it, whether in Paris or New York. Infidelity is not half as ity has gone on straight alead not-bold now as it used to be. and infidelity has not destroyed "But," say our antagonists, "Chrischurch or crippled a minister, or rooted tianity is falling back because science, out one verse of the Able, and now its chief enemy, is triumphing over it." Now, I deny that there is any war betinues to advance, may we not conclude said Joseph Henry, so said Prof. Hitchsaid Joseph Henry, so said Prof. Hitch-cock, so said Prof. Silliman, so said that as the stwiler and shot of the other side seem to be exhausted. Christianity is going on with more rapid

Joseph Recry, the leading scientist of America, better known and honored I find an encouraging fact in the in the royal societies transatlantie thought that the secular press in this than any other American, lived and died a believer in the religion of Jesus day and the pulpit seem harnessed in the same team for the proclamation of Christ Joseph Henry knew all the the Gospel. To-morrow there will not facts of geology, and yet believed the book of Genesis. He knew all the be a banker on Wall street, or State street, or Third street, who will not facts of astronomy, and yet believed have in his pocket or on his table the book of Joshua, the sun and moon treatises on Christianity, calls to restanding still. Joseph Henry knew all the anatomy of man and fish, and yet believed the book of Jonah. pentance and Scripture passages, believed the book of Jonah. If the scientists of the day were all eity and other cities. Why, that thing agreed, and they came up with a solid would have been impossible a few haps they might make some impression years ago. Now, on Monday morning and Monday evening, the secular press upon it, but they are not agreed. It is often said that we religionists are failspreads abroad more religious truth than all the tract societies of the couning in our advocacy of Christianity betry spread in the other six days. cause we differ in our theology. I tell Blessed be the tract societies! We hail you we do not differ inside the church

them, and we hall these others. in theology half as much as they differ I say it would have been impossible outside the church in science. If they reject our religion because we differ on a few years ago. Hundreds of letters would have come to the secular some minor points, we might just as well reject science because the scien-tists differ; but as far as I can tell the newspaper offices, saying: "Stop my paper; we have religion on Sunday; don't give us any through the week. Stop my paper." But I have been told that many of the secular papers have each other; and as far as I can tell it is their largest circulations on Monday morning, and the whole population of this country are becoming sermon readers. Besides that, have you not noticed jar, chemical apparatus and chemical that papers proclaiming themselves see ular almost every week have religious liscussions in them?

Go back a few years, when there was about the origin of life is going to be not a decent paper in the United States werthrown by men who have different that had not a discussion on the doctrine of eternal punishment. wits made merry, I know; but there was not an intelligent man in the United States that, as a result of that controversy in regard to eternal punishment, did not ask himself the question, "What is to be my eternal destiny?" And so some years ago, when Tyndall offered his prayer guage, there was not a secular paper in the United States' that did not discuss the question, "Does God ever answer prayer? May the creature impress the Creator? Are not all these facts encouraging to every Christian and every philanthropist? Besides that, the rising generation are being saturated with Gospe truth as no other generation, by this international series of Sunday-school

Formerly the children were expected only to nibble at the little infantile Scripture stories, but now they are taken from Genesis to Revelation, the strongest minds of the country explain ing the lessons to the teachers, and the teachers explaining them to the classes; and we are going to have in this coun try 5,000,000 youth forestalled for Chris tianity. Hear it! Hear it!

Besides that, you must have noticed, if you have talked on these great themes, that they are finding out that while science is grand in secular directions, worldly philosophy grand in secular directions, they can not give any comfort to a soul in trouble.

PROF. BARRAUD of the Liele observatory, who has just returned to California after a vacation in Europe, says that one thing he learned alread was that American astronomers and instrument makers are fully able to take care of themselves. Some instruments of our manufacture are perhaps not ac elescopes foreign makers are not ton on compared with us. At Munichelely. median-circle instruments the inps slightly shead of us, bods.
